

# THE BRITISH BOARDING EXPERIENCE, CLOSER TO HOME

*Away enough to grow. Close enough for Sunday lunch.*

Just a short flight from Singapore, Epsom College Malaysia gives your child the opportunity to **live and learn on campus during the week**, developing the independence, confidence and responsibility that come with a British boarding education while still being close enough to return home and spend quality time with family over the weekend. The campaign specifically allows weekday boarders to spend weekends at home.

## More Than Just a Place to Stay

Boarding at Epsom is about much more than accommodation. Students become part of a supportive House community, with Houseparents living alongside them, tutors who know each child, and a pastoral team available throughout the day and night.

### LIVE

### LEARN

### GROW

During the week, students benefit from a structured environment that helps them develop **independence, responsibility and better study habits**. Supervised prep, clear routines and an overnight no-device policy help create boundaries around study, while Epsom's 50-acre campus gives students space for sport, activities, friendships and life beyond the classroom.

## Academic Ambition Without Compromise

Boarding does not mean taking a step back academically. Epsom combines strong academic outcomes with pastoral care and opportunities beyond the classroom, keeping pathways to leading universities in the UK, Singapore and around the world open.

## Experience It Before You Decide

Rather than simply hearing about boarding, families can experience it first-hand through our **Boarding Taster Programme**, giving students the opportunity to live, study and take part in campus life at Epsom before making their decision. The campaign currently plans one-week taster cohorts alongside Epsom students.
